Varnished Cambric Insulated Cables for Normal Works.

Gentlemen,

No. S. P. C. 8933-72. I request you to be so good as to intimate your best present day prices and the earliest time of delivery for the V. C. I. Cables as per enclosed schedule.

The manufacture and the materials used in the construction of the cables shall fully conform to the latest B. S. S. or A. I. E. E. or I. P. C. E. A. Standards and particularly to the following specifications:—

The conductors shall be of the highest conductivity electrolytic copper. The varnished cambric insulation shall be of the highest grade (black asphaltic base) and shall be applied in the form of helically-wound tape with an insulating compound between alternate layers. Its tensile strength measured lengthwise before application shall not be less than 3,000 lbs. per sq. inch and in the case of samples taken out after application to a cable, it shall not be less than 2,400 lbs. per sq. inch. The average breakdown strength of insulation before application to the cable, it shall not be less than 1050 volts per mil at 25°C nor less than 850 volts per mil at 75°C. The dielectric strength of samples taken after application to a cable shall not be less than 80 per cent of the value before cabling as mentioned above.

They shall be suitable for use in a tropical climate. They will be required to be supplied in the longest manufactured lengths wound on non-returnable wooden reels suitably lagged and protected against damage during shipment or overland transport.

The cables will be required to be tested before despatch and test certificates thereof will have to be furnished along with the invoices.

They should furnish along with your quotations full specifications and the details of construction of the cables offered together with the following particulars without which your quotations will not be considered.

- 1 Overall diameter of cable
- 2 Radial thickness of steel tape armouring
- 3 Do lead covering
- 4 Do jute serving
- 5 Do weather proof braiding
- 6 Do varnished cambric insulation
- 7 Cross section of the conductor in square inches
- 8 No. of strands and diameter of each strand

- 9 The dielectric strength of the varnished cambric per unit at 25°C. used for the manufacture of the cable before and after cabling.
 10 D. C. Resistance per 1,000 ft. of conductor at 25°C.
 11 Do do do 65°C.
 12 The insulation resistance of cable in Megohms per 1,000 ft. at 60°F.
 13 Length of cable in feet on each reel
 14 Net weight of cable on each reel
 15 Gross weight and size of each reel ready for shipment.

The material may be supplied from your stock and from incoming consignments or from your penel quota.

The prices to be quoted should be on C. I. F. Madras basis.

Your quotations should be submitted in duplicate superscribed as "Quotation for Varnished Cambric Insulated Cables" so as to reach this office not later than 2nd December 1946.

Enquiry No. 7809—E. D. 957.

Moving coil Voltage regulator and voltage Stabilizer.

Gentlemen,

No. S. P. C. 8641-70. I request you to be so good as to intimate your best present day prices and the earliest time of delivery for the following:—

Item 1 : Moving coil Voltage regulators:—

(a) 5 KVA	...	2 Nos.
(b) 7.5 KVA	...	4 Nos.
(c) 10 KVA	...	2 Nos.

Single phase unit designed to maintain voltage automatically at the output terminals under all load conditions suitable for use on a supply system voltage which is varying between 190-V to 260-V, for frequencies of 45 cycles to 66 cycles per second and the power factor varying 0.8 to unity. A voltage controlled, frequency compensator relay, an Astatic voltage relay, etc., shall be incorporated in the regulator so that this can be so adjusted that the complete unit will automatically correct variations from +8 per cent to—12 per cent in the voltage supply within $\pm\frac{1}{2}$ per cent of the nominal value. If the automatic operation becomes inoperative due to a fault in the control circuit, the voltage shall be capable of being regulated manually for which suitable provision should be made.

Item 2 : Automatic voltage stabilizer:—

(a) 5 KVA	...	2 Nos.
(b) 7.5 KVA	...	4 Nos.
(c) 10 KVA	...	2 Nos.

Suitable to absorb the ups and downs of input voltage or variable input voltage when connected to any ordinary power supply line, single phase 45 to 66 cycles, whose voltage varies between 190 and 260-V., and to deliver a constant output voltage, providing tapings for 3 output constant voltage 220-230-240 volts at a variation limit of power factor 0.8 to unity and the output voltage wave practically free from harmonics.

As the above equipments are required for use with laboratory testing equipments, precision electrical processes, telephone apparatus and on full wave rectifiers the automatic voltage stabilizers and the moving coil voltage regulators should instantaneously respond to the variation of voltage and be quite in operation and also well protected against short circuit currents.

Illustrated and descriptive literature, drawings and technical data should be furnished along with the quotations without which they will not be considered.

Your quotation may be submitted in duplicate, superscribed as "Quotation for Moving Coil Voltage Regulator and Voltage stabilizer" so as to reach this office not later than 21st November 1946.
